PROFILE

Python Developer with 2+ years of experience building computer vision and automation-driven applications, backed by an additional 1 year of experience as a Flutter Developer building scalable, high-performance cross-platform mobile applications for Android and iOS. I specialise in real-world CV solutions using Python, OpenCV, and hand-tracking/face-recognition models, including sign language recognition and biometric security systems, alongside a strong foundation in mobile architecture, REST API integration, and third-party services (Razorpay, Stripe, Firebase).
With a problem-solving mindset and a commitment to clean, maintainable code, I bring versatility across both computer vision engineering and mobile development, having built and shipped 2+ real-world CV systems for automation and security use cases, and multiple production Flutter apps.

PROFESSIONAL EXPERIENCE

KeasBrain Technology , *Python Developer* 05/2024 – Present
Jaipur

- Built and deployed 2 computer vision projects using Python, OpenCV, and machine learning models for real-world automation and accessibility use cases.
- Integrated REST APIs and SQL databases to store and manage user/locker records, recognition logs, and authentication data.
- Applied core CV/ML concepts, including image preprocessing, feature extraction, and real-time frame processing for accurate detection under varying conditions.

KeasBrain Technology , *Flutter Developer* 05/2023 – 2024
Jaipur, India

- Built and shipped 3 production Flutter apps across Android & iOS, serving thousands of active users.
- Collaborated with UI/UX designers to implement responsive and visually engaging user interfaces.
- Integrated REST APIs, Firebase services (Auth, Firestore, Analytics, Crashlytics), and Razorpay payment gateway to enhance app functionality.
- Successfully published and maintained apps on Google Play Store and Apple App Store with regular updates and feature enhancements.

EDUCATION

Bachelor of Science, *Dav College* 06/2018 – 08/2021

Masters Computer Application, *Dr. Preeti Global University*

PROJECTS

Sign Language to Voice Converter | Python

- Built a computer vision system to detect and interpret hand-based sign language gestures in real time
- Converted recognized signs into spoken audio output, aimed at improving communication accessibility for the hearing/speech impaired

Smart Banking Locker Security System | Python

- Developed a face-detection based locker access system that verifies user identity along with age, emotion, and behavior analysis before granting access
- Designed to flag abnormal emotional states and suspicious behavioral patterns (e.g. distress, erratic movement, forced/coerced actions) as a theft-prevention safeguard, denying locker access under suspicious conditions

Firstdose (User App) | Android,IOS , *Android An on-demand medicine ordering app connecting patients with local pharmacies. Flutter • Dart • GetX • REST APIs • Google Maps • Firebase Auth • Push Notifications*

- Implemented medicine search, cart, and order placement flow with pharmacy-based routing
- Integrated Google Maps for nearest pharmacy discovery and delivery tracking

Visuti Career | Android , IOS , *A NEET counselling guidance app to simplify the admission journey for medical aspirants. Flutter • Dart • Bloc • REST APIs • Razorpay • Firebase Auth • Push Notifications*

- Built structured counselling modules with step-by-step guidance and document checklist flows
- Integrated Razorpay for counselling plan purchases and subscription management

SKILLS

Languages: Dart, Python | Frameworks: Flutter | Database: SQLite, PostgreSQL/MySQL |
Backend & Services: Firebase Auth, REST APIs, FastAPI | State Management: GetX, BLoC |
Machine Learning / CV: OpenCV, NumPy, Pandas, scikit-learn | Tools: Figma, Postman, GitHub, Git (Version Control), Docker |
DevOps: CI/CD (GitHub Actions) | Payments: Razorpay, Stripe | Testing: Unit Testing (pytest / Flutter widget tests)

CODING PROFILES & ACHIEVEMENTS

Flycodx (Profile: /ankusharora1112) | Python
- Solved **125+ Data Structures & Algorithms problems** with a **27.2% acceptance rate**, focusing heavily on Arrays, Strings, Sliding Window, Linked Lists, and sorting.
- Achieved a max contest rating of **800** and am currently ranked **#1** in global/country rankings on the platform.

LANGUAGES

Hindi | English

CERTIFICATES

Flutter & Dart - The Complete Guide | Google Ads Certificate

INTERESTS

- Self-Development Reading
- DSA practice

ACHIVEMENTS

Published Flutter Package on pub.dev ,
Developed and published a Flutter package on pub.dev, contributing to the open-source Flutter community

10,000+ App Downloads on Google Play Store,
Multiple production apps crossed 10,000+ downloads, reflecting real-world user adoption and app quality
